# Canon Collection square display plate 35.5 centimeter melamine in white

Featuring a seamless square design and a crisp white color, the Canon Collection display plate by Pujadas adds a clean, modern look to your serving area. This versatile plate is made of melamine, which is a synthetic resin that becomes hardened and formed after heating. It looks like porcelain, but is more durable and lighter weight, so it's a better choice for busy foodservice operations. Heat- and corrosion-resistant, this display plate has a temperature range of -20°C to 70°C (-4°F to 158°F). The nontoxic, odorless construction is SGS-certified for food contact, making it a popular choice among catering operations, restaurants, hotels and more.
