BENTWOOD

Grinders for Better Taste

The Mission

Our mission is to unleash the full taste potential of every coffee bean in the most enjoyable and beautiful way.

The Name

Bentwood relates to the material of coffee house chairs in the early days of coffee houses, a time when they were flourishing as the place to socialize, dream and discuss about life.

The Operations

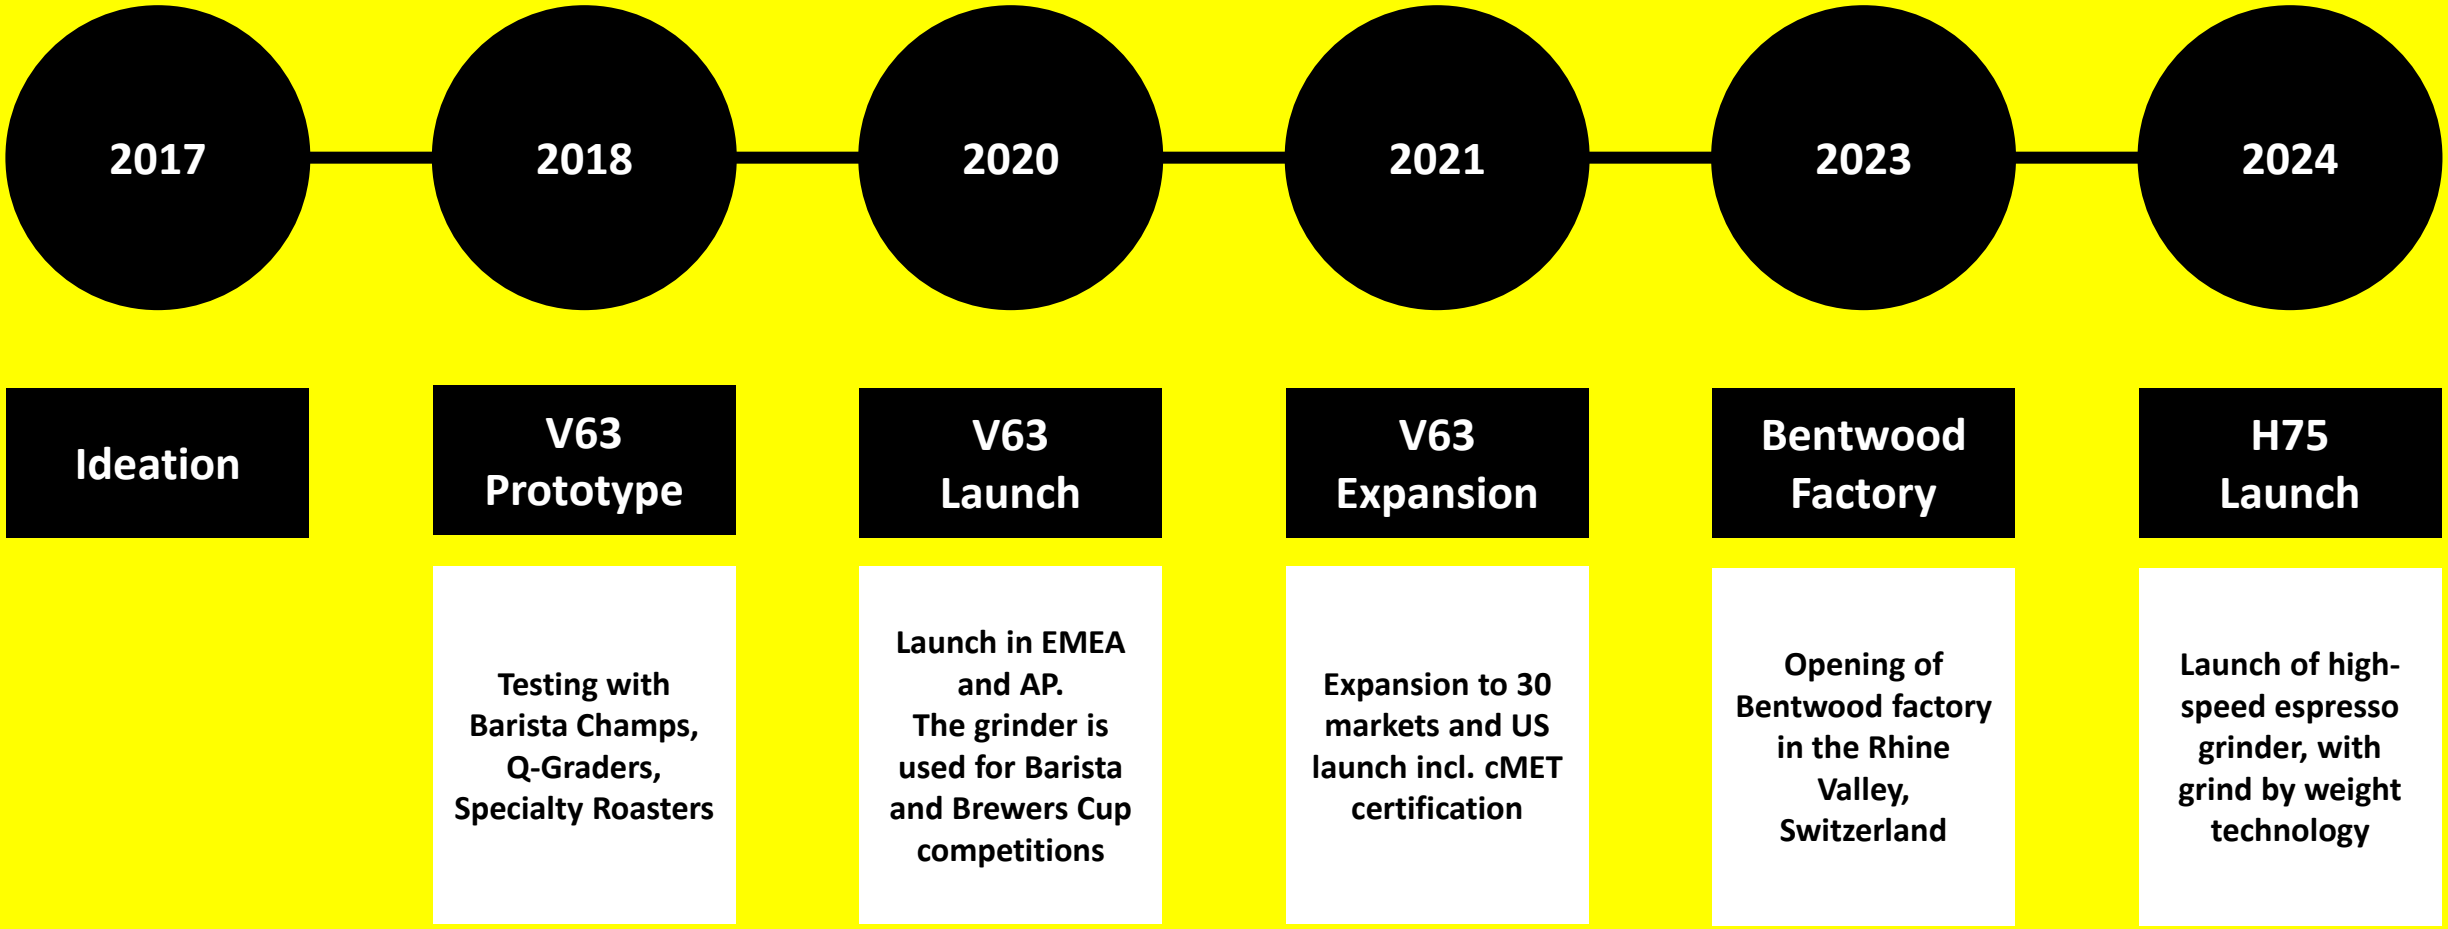

Office in Cham (Zug), Switzerland

Own assembly in Altstaetten (St.Gallen), Switzerland, est. 2023. Products classify as Swiss Made.

External engineering team, based in Switzerland and Germany, with deep expertise in the coffee industry

A Story of Constant Development

BENTWOOD

VERTICAL 63

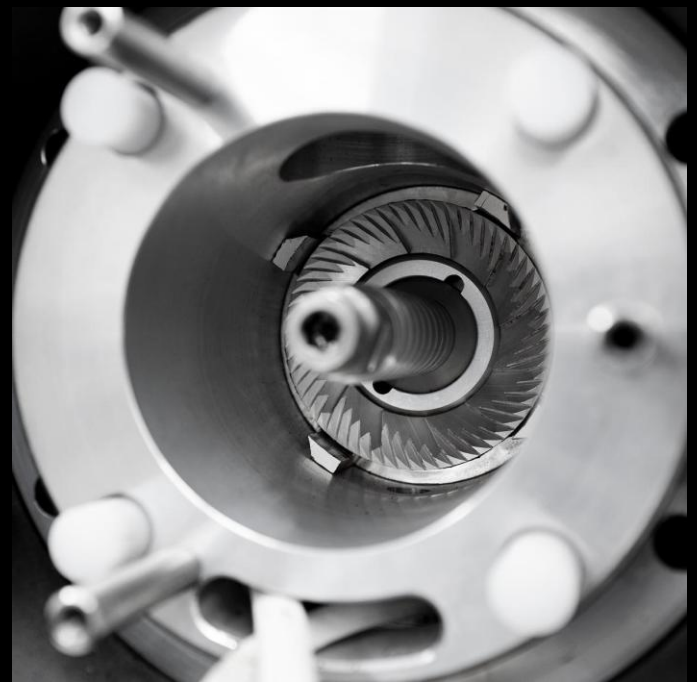

Key features V63

- Intuitive Grind Adjustment, grind setting gives indication of the particle size in micron
- Vertical 63mm flat steel burrs, with no screws from the front for a better particle shape and distribution curve
- Geometry that works for espresso, drip coffee, cold brew, french press
- Solid mechanical set-up with tight tolerances.
- Cool grinding with double ventilation system under the motor.
- Easy service, little cleaning.

BENTWOOD
