

"Always a fresh, healthy, and natural breakfast.
In the same time that you wait for your coffee."

What is the professional interface?

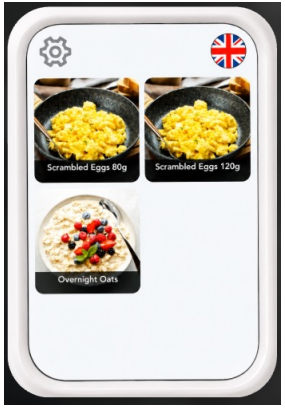

The professional interface is a simplified interface that allows the operator to chose from multiple cooking recipes.

Benefits:

- **Efficiency**

The system works faster, since there are no check-questions asked and the animation is taken out.

- **Customize any cooking program**

You can customize all cooking programs to enable exact cooking results and cook different recipes.

- **Made for the operator**

In 3 steps the machine starts cooking. 1. Insert the cup 2. Press the recipe 3. Close the lid.

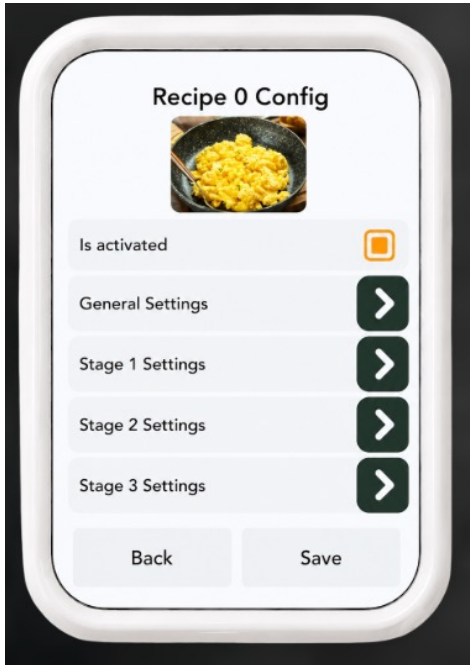

The Eggcheff Scrambled® → Professional interface

With the professional interface you can…

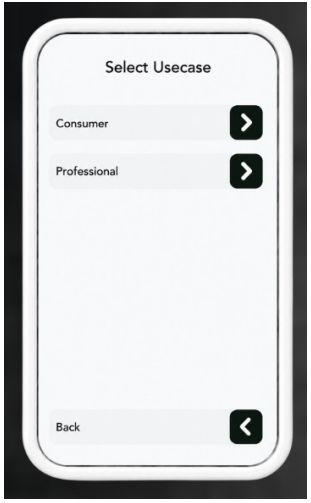

- Create your own cooking program

Variables:
- Temperature based / Time based cooking
- Fork Yes/No
- Stirring speed
- Cup rotation speed
- Airflow in cavity
- STAGE 1
- STAGE 2
- STAGE 3

- Adjust minimum and maximum fill levels per recipe
- Activate / deactivate recipes

When machine starts 1st time: Select use case:

After selecting. Always starts in this setting. Change in maintenance menu.

Recipe suggestions

Many more:

- Egg white
- Eggs + custom ingredients (custom cooking process)
- Egg Souflé
- Soup
- Pasta (one minute)
- …

Local ingredients can be used. Cooking programs need to be tailored to the local ingredients that are available!
First ask for the ingredients available, then test in-house, then go to client.

Thank you.
